

SINGLE QUALITY SOLUTION 3

The Single Quality Solution 3 (SQS3) is an error proofing software that helps achieving zero defects and reducing cost of rework, scrap or warranty claims.

In combination with the industrial PC HLTQ it guides operators step by step through the assembly process.

The software ensures that all fasteners are torqued with the appropriate tool, the correct program, and the right socket to improve product quality and eliminate waste of material.

The data collection feature records the results of all assembly tasks for traceability purposes.

The integrated configurator has a user-friendly interface that does not require programming skills to set up and configure new products and processes.

TOOLSNET REWORK

ToolsNet Rework, as a module of the SQS3 error proofing software, helps achieving zero defects in rework or repair processes improving productivity and trust of your customers.

Main functions of ToolsNet Rework:

- Queries ToolsNet for OK and NOK tightening data of products.
- Computes consolidated status (OK or NOK) of products based on tightening data.
- Guides operators through the repair process of NOK products.
- Selects the right tool and correct tool parameters required for the repair process.
- User access control ensures only qualified operators are working at the repair station.
- Returns tightening data of repair process to ToolsNet for full traceability.
